Call for Nominations

Dear

According to the bylaws of the International Society of Behavioral Nutrition and Physical Activity (ISBNPA), you are invited to submit nominations for the election of:

- two member-at-large positions

for the ISBNPA Executive Committee. Each voting member of the Society is offered the opportunity to nominate candidates to be considered by the Nominations Committee in the preparation of the slate of candidates to be submitted for ballot in November 2016. The nominee has to be a member of ISBNPA at that time.

The qualified individuals receiving the highest number of nominations will appear on the election ballot. The Nominating Committee will place the name of additional qualified candidates of its choice on the ballot as well.

In keeping with the international basis of the ISBNPA and its focus on behavioral nutrition and physical activity, we expect that you will consider these two important aspects in your suggestions.

As you think about your proposed nomination(s), please consider that service on the ISBNPA Executive Committee requires a commitment of time, talent, energy and creativity to advance our goals and mission. The rewards are enormous. EC leadership positions bring opportunities to make a lasting difference for our members and for the fields we serve. Self-nominations are accepted.

Please use the following form for nominations

https://goo.gl/forms/0sQSzH56JNFnsOtZ2

and complete your nominations until October, 23, 2016.

Please note that your name must appear on the nomination form to validate your nomination.

If you have any questions, please email António Palmeira, ISBNPA Executive Director at executivedirector@isbnpa.org.

Thank you for your support.

Sincerely,

David Crawford, Nominations Chair and ISBNPA Fellow
We welcome expressions of interest from potential committee members, particularly those keen to assist in establishing a Mid Career Researchers’ Network or supervising the ISBNPA Mentoring Scheme. Plenty of opportunities to get involved - to do so, please email Helen Elizabeth Brown (University of Cambridge) at heb56@medschl.cam.ac.uk.

**Participate in our members activities**

*Lesley Lytle* is involved in an exciting research project: the **ADOPT Core Measures** Project aims to advance adult obesity treatment in the face of well-documented individual variability in response to treatment. To achieve this goal, there is a critical need to better understand the sources of this variability and develop models which integrate behavioral, psychosocial, environmental, and biological predictors and moderators of adult treatment responses. Learn more about this project [HERE](#).

*Lucy Davies* calls the attention of our Early Career Researchers (but open to all) about a workshop on Grant Writing Skills. Learn more about this learning opportunity [HERE](#).
